

# Conclusion

Conclude your journey with the course summary along with the feedback details.

Congratulations on completing such a challenging course!

We hope your new object-oriented design skills help you ace your next OOD interview. If you'd like to prepare further, we have several other interview preparation courses available on our platform. You may sharpen your algorithm analysis and design skills or improve your system design skills to position yourself for a role with greater technical responsibilities.

We carefully selected our design problems from many different domains, and made an explicit effort to incorporate some unique aspects or issues of object-oriented design activity in each of them.

Whatever you choose to do, remember that hands-on preparation is the best way to calm those pre-interview anxieties, and Educative is here to help every step of the way. Good luck with your interview and happy learning!

Finally, we would like to thank you for taking the time to complete this course! We hope that it was a great experience for you. We look forward to hearing from you!
